

EPFO Workflows Guide

A structured reference to Employees' Provident Fund Organisation online services

EPFO (Employees' Provident Fund Organisation) is a Government of India body under the Ministry of Labour and Employment that manages retirement savings, pension, and insurance for salaried employees. Every employee gets a UAN (Universal Account Number) that stays with them for life, linking every job they hold to one continuous PF record. This guide lists every major workflow available on the EPFO portal, grouped by who it's for.

1. For Employees / Members

1.1 UAN Activation

Activate your Universal Account Number via Aadhaar-based Face Authentication on the UMANG app. This is the first step and unlocks every other member service.

1.2 View Passbook

Log in to the member portal to see monthly PF contributions and accumulated interest.

1.3 KYC Update

Link Aadhaar, PAN, and bank account details to your UAN. Mismatched KYC can block contributions and withdrawals.

1.4 Job Switch / Transfer

When you change jobs, your new employer links your existing UAN to the new PF member ID. Your old balance carries over automatically — no separate transfer request is usually needed.

1.5 Online Withdrawal / Claim

Apply online to withdraw PF funds (full or partial) for reasons such as job loss, home purchase, medical needs, or marriage.

1.6 E-Nomination

Name the person(s) who should receive your PF balance in case of death. This is mandatory under the EPF Scheme.

1.7 Grievance Filing (EPFiGMS)

If a claim is delayed or something goes wrong, file a complaint through the EPFiGMS portal or the UMANG app. You get a tracking number and updates via SMS/email.

1.8 Balance Check Without Login

Give a missed call or send an SMS from your UAN-registered mobile number to instantly receive your PF balance.

2. For Employers

2.1 UAN Generation

If a new hire has never worked before, the employer generates a fresh UAN for them through the employer portal.

2.2 UAN Linking

If the new hire already has a UAN from a previous job, the employer links the new PF member ID to that existing UAN.

2.3 ECR Filing

Employers upload the Electronic Challan-cum-Return (ECR) each month, reporting PF deducted and deposited for every employee.

2.4 KYC Digital Signing

Employers verify and digitally sign off on employee KYC details before contributions can be processed correctly.

3. For Pensioners

3.1 Pension Claim (EPS)

Apply for monthly pension after retirement, calculated from your PF service history under the Employees' Pension Scheme.

3.2 Digital Life Certificate

Pensioners submit an annual proof-of-life certificate online to keep pension payments uninterrupted.

Quick Summary: Job-Switch Flow

Employee shares their UAN with the new employer → employer links the new PF ID to that UAN and re-verifies KYC → old PF balance merges automatically under the same UAN. No new account is created.
